

Receiving Samples and QC for Processing with BioMicroLab Instruments

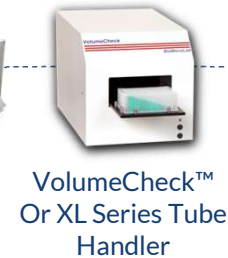

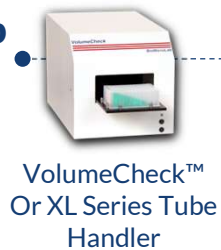

Workflow Description: This workflow is for laboratories that need to quality control check incoming patient samples and pre and post liquid handling processing

Most Commonly Used in: Sample Compound Storage Labs using a variety of sample storage methods

BioMicroLab Instruments used in the workflow

About BioMicroLab

BioMicroLab builds Sample Management Automation & Robotics for Laboratories worldwide. Our goal is to design efficient sample management robotics to accelerate your workflow and provide proven return on investment. BioMicroLab robotics platforms are designed for compatibility within the ANSI/SLAS standards to ensure integration with automation oriented labware.
